

How can social media influence skin care?

Internship Programs

Simple. By increasing the demand – and performance – of skin care products. By broadcasting to the world via photos and videos how people look, social media provides an ideal forum for identifying and discussing what consumers want. That's how science and humanity come together to solve real-world challenges.

A career with us is an invitation to explore, create and make valuable contributions to human progress. We're a global team of problem-solvers, impacting everything from automobiles, to agriculture. And there's a science to our success. **That's Dow.**

The science to your success.

Internship Programs

Solving humanity's most pressing challenges requires commitment, a passionate drive to change the world, and the imagination to turn solutions into realities. As a participant in our 3- to 12-month internship programs, you'll gain experience, unlock your potential and make meaningful contributions to real projects. If you're a talented, high-performing student with excellent critical thinking skills, a global mindset and broad vision, this is an ideal place for you. Join us, and build the knowledge and abilities you need for early career success—all while creating the solutions that are reshaping our world.

There's a science to your development.
And it starts at Dow.
